## 2018 TWI Message

In this era, science and industry are deeply intertwined, and finance-oriented plans are the most valued; individuals and organizations are subject to full-openness and transparency, and so there is a demand for independent and sole security.

TWI responds to this era through activities with its relation to the University of Missouri-International Programs desk.

In 2018,

TWI looks forward to the escalated Breathing Product activities of the Board Members based on their individual skillful and independent free-approaches from their insights.
